

Amendment to the Specification:

Please delete the sentence on page 11, lines 1-2, which begins "The Graft 10..."

Please add or replace the page after the Claims with the following new paragraph:

PRE-SHAPED INSTRUMENTAL GRAFT

ABSTRACT

An intraluminal graft having a pre-determined substantially non-linear configuration is ideally suited for implantation within individuated aneurysmal regions, tortuous vessels or primarily non-linear vessels. The graft has a diameter at a first end that is wider than the rest of the graft and the first end is angled so that when it is viewed in a vertical cross sectional plane, a portion of the tubular body extends outwardly longitudinally a distance greater than the remainder of the first end. The first end also has a noncircular opening.
